Clean Energy Works Portland

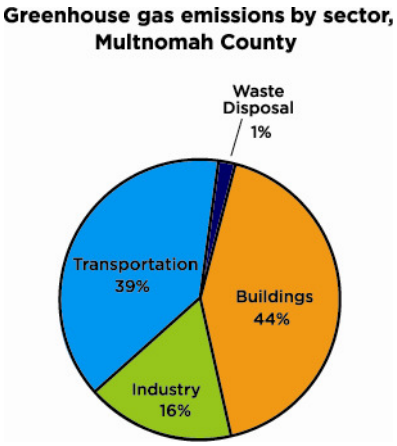
Creating jobs, saving energy and reducing carbon emissions

Clean Energy Works Portland is a hassle-free program to help Portlanders make energy efficiency improvements to their homes. The program offers:

- **Simplified financing** for home weatherization, space heating and hot water system improvements. Project costs can be repaid on utility bills.
- **Access for homeowners from all income levels.** Participants from a variety of income levels and credit qualities will receive low-interest financing with payment terms that roughly match projected energy savings.
- **One-stop-shop support.** Homeowners are paired with an Energy Advocate to answer questions, explain the recommended measures and financing options, and assist with the installation process.

Clean Energy Works will create quality jobs and reduce carbon emissions in Portland.

Clean Energy Works is a central strategy in Portland's new Climate Action Plan as well as the City's Economic Development Strategy, which seeks to create jobs by building on the region's strong clean tech and sustainable industries sectors.



Clean Energy Works is intended to put contractors to work today to improve the quality of housing in Portland and reduce energy costs for decades to come.

A Community Workforce Agreement signed by contractors, organized labor, community-based organizations and faith groups guides the creation of work standards and community benefits to ensure economic opportunities for historically underrepresented communities, including people of color and women.

In July 2009, the City of Portland launched a 500-home pilot seeded by American Recovery and Reinvestment Act dollars and in collaboration with:

- Shorebank Enterprise Cascadia
- Energy Trust of Oregon
- Multnomah County
- NW Natural
- Pacific Power
- Portland General Electric
- Worksystems, Inc.
- Green For All
