### Portland Wind Power

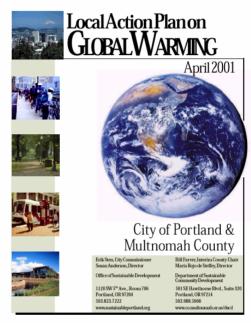

Our Renewable Future Begins Now

# Global Warming Action Plan

- Actively address climate change for sustainable future
- Community-wide goals
- Targeted actions: energy efficiency, renewable energy, transportation, waste reduction and recycling, expanded forestation and education-research.
- Flagship renewable energy goal:

"Purchase 100 percent of City government electricity load from new, renewable resources by 2010."

### Fossil Past, Renewable Future

## Reaping Renewable Benefits

- Stability long term pricing predictability
- Fossil fuel Independence
- Local, local, local
- Urban-rural economic development
- Portland leadership and differentiation
- Considerable CO2 reductions
- Modeling a sustainable future

# Leveraging Opportunities

- Distribute RFI to private sector
- Seek aggressive pricing opportunity
- Encourage creative, competitive thinking
- Recruit partners for win-win success

# Benchmarking Progress

#### A Better Future. A Better Now.

Under the direction of Commissioner Dan Saltzman, The Portland Office of Sustainable Development (OSD) is leading the way toward a healthy and prosperous future Portland. OSD advances improvements and innovation in energy use, waste disposal, recycling and green building. OSD programs and policy are key to economic and environmental opportunities for the City, its businesses and residents.
