Four questions to shape the discussion:

- 1) The household prosperity metrics in the strategy (5-8) include specific targets. Are those targets too aggressive or unrealistic? Should we set aspirational or realistic targets?
- 2) Are there other quick-starts we have missed – other actions that would more effectively implement the goals of the strategy?
- 3) Do the actions reflect the stated commitment to disparity reduction and equity?
- 4) Which actions should be dropped, or changed, and why?
