

Heritage Trees of Portland

PECAN (*Carya illinoensis*) JUGLANDACEAE

- Native to south-central U.S. and Mexico.
- Height can exceed 170'.
- Leaves are compound with 11-17 leaflets.
- In Portland the nuts do not ripen because of coolish summer nights. Tree has both male and female catkins.
- No significant fall color. Foliage remains into November.
- Very rare in Portland.
