RE: Amendment: Utility Customer Service Division Transfer to Water

- 
1. Transfer customer service operations – the Utility Customer Service Division to the Water Bureau. Direct the Water Bureau in consultation with BES to develop an account service charge to fund the Utility Customer Service Division.
  2. Establish a utility safety net to provide for emergency utility payments to ratepayers with employment, medical and other personal emergencies. Pay for the utility safety net from a special appropriation financed by utility rate revenues.
  3. Retain the Business Solutions Division (8 FTE's) in the Revenue Bureau to be funded through an Interagency Agreement.
  4. Maintain an interagency coordinating committee consisting of representatives from the Water Bureau, Bureau of Environmental Services, Revenue Bureau and the Auditor's Office. The Committee should guide policy development and set priorities for customer service, billing and payment processing and collections services.
  5. Develop service level agreements and measurable performance standards for customer service, billing and payment processing and collections services.
