

Vegetation Unit Summaries for **West Lents Floodplain (WLNT)**

Report date: 3/27/2007

'*' = non-native invasive species

Visit data as of: 3/27/2007

Unit rWLNT*64

Size: 0.42 Acres

NVCS Subclass: Deciduous forest

% Tree canopy: 65%

% Non-Native Cover: 85

Slope: na

Aspect: na

Visit date: 7/25/2006

Wetland indicators: Streams, Hydrophilic Vegetation. (Surface water was present)

Dominant Trees: bigleaf maple (*Acer macrophyllum*). **Trees > 20% cover:** Oregon ash (*Fraxinus latifolia*).

Dominant Shrubs: Himalayan blackberry (*Rubus discolor**).

Dominant Grasses: reed canarygrass (*Phalaris arundinacea**).

Additional Invasives: bittersweet nightshade (*Solanum dulcamara**), spiny sowthistle (*Sonchus asper**), Japanese knotweed (*Polygonum cuspidatum**), English holly (*Ilex aquafolium**), Norway maple (*Acer platanoides**), herb-Robert (*Geranium robertianum**), English ivy (*Hedera helix**), morning glory (*Convolvulus arvensis**), clematis (*Clematis vitalba**), European hawthorn (*Crataegus monogyna**).

Ecological Health: Fair.

Primary Management concerns: heavy level of invasive species, Trampling, Litter, Informal Trails.

Unit rWLNT*65

Size: 0.64 Acres

NVCS Subclass: Deciduous forest

% Tree canopy: 70%

% Non-Native Cover: 80

Slope: na

Aspect: na

Visit date: 7/25/2006

Wetland indicators: Streams, Hydrophilic Vegetation. (Surface water was present)

Dominant Trees: Oregon ash (*Fraxinus latifolia*).

PORTLAND PARKS & RECREATION

Healthy Parks, Healthy Portland

Dominant Shrubs: Himalayan blackberry (*Rubus discolor**).

Grasses > 20% cover: reed canarygrass (*Phalaris arundinacea**).

Additional Invasives: black locust (*Robinia pseudo-acacia**), bittersweet nightshade (*Solanum dulcamara**), herb-Robert (*Geranium robertianum**), European hawthorn (*Crataegus monogyna**), clematis (*Clematis vitalba**), morning glory (*Convolvulus arvensis**).

Ecological Health: Poor.

Primary Management concerns: heavy level of invasive species, Litter.
